

# ***AMERICA'S CENTER PROGRESS REPORT***

January 2024  
Vol. 6

Major construction for the first phase of AC Next Gen including the 72,000 sq. ft. exhibit hall and 23 covered and enclosed loading docks (doubling our capacity) is nearing completion and will welcome guests and freight in a few short months.

The next phase will soon be underway to create a new 88,000 sq. ft. outdoor events plaza and unite it seamlessly with the complex.

Construction of the new west entrance and lobby at 9th and Martin Luther King Dr. to access the new hall and existing halls 3 and 4 is underway and will be completed this summer.

A temporary wall presently separates the new exhibit hall (4X) from existing halls 3 and 4 allowing us to host events without interruption as the construction unfolds outside the wall.
